

# IDROMAT 3-4 60 Hz Electronic regulator for pumps

## Construction

Regulation device for pump control equipped with flow and pressure sensor connected to an electronic system. Inlet and delivery connection ports of the same diameter (G1). Built-in check valve. Pressure gauge 0-10 bar supplied as standard for all the models. Automatic reset function in IDROMAT4 for the reset of the system without manual operation.

## Applications

Automatic control of pumps for water supply and increase of network pressure.

**Control of starting/stopping of the pump** when cocks are opened/closed.

### For protection of the pump:

- against dry running;
- against the risk of operation without water at the inlet (caused by a lack of water inflow in the inlet pipe under positive suction head, by a non-immersed suction pipe, by excessive suctionlift or by air entering the suction pipe);
- against operation with closed connection ports.

## Operating conditions

TYPE	Switching-on pressure	Pump head
<b>IDROMAT 3-12</b>	1,2 bar	> 20 m
